

LEAF

There's excitement. Then there's the kind of excitement that makes every moment behind the wheel a rush. With a range of up to 311 kilometers, the Nissan LEAF can take you on amazing adventures. Put your compatible smartphone on the big screen and connect your world.* Drive with more confidence, thanks to a suite of Nissan Intelligent Mobility features that can look out all around you.** The Nissan LEAF. This is how driving should feel. This is Nissan Intelligent Mobility.

100% Electric.

0 Emission.

3 | KM***

Photo may vary from actual unit.

The right technology at the right moment.

The Nissan LEAF is designed with intelligent technology that aids your drive when you need it. For example, when you're driving up a spiral parking ramp – the Intelligent Trace Control can assist you in your drive by reading your situation and, if needed, can gradually hit the brake to help you steer smoothly through the corners. It's good to know that you're not alone. With an entire suite of Nissan Intelligent Mobility features to back you up and help you keep out of trouble, the Nissan LEAF turns your journey into a confident, assured, more exhilarating ride every day.

Intelligent Cruise Control

The Intelligent Cruise Control reduces the driver's workload when cruising by automatically controlling acceleration and deceleration to maintain a suitable distance, set by the driver, from the vehicle ahead.

High Beam Assist

The High Beam Assist automatically switches the headlights setting to low beam from high beam when it detects a vehicle ahead.

Intelligent Trace Control

Controlling the brakes on each of the four wheels in response to different driving circumstances, the Intelligent Trace Control provides the driver a more optimal line through a turn on winding roads.

Hill Start Assist

The Hill Start Assist keeps you from rolling backwards on inclined roads by automatically holding the brakes as you switch from brake pedal to accelerator.

Move through life with greater confidence.

Driving tech should be an extension of who you are - it should think, feel, and react with you. To ensure your safety on the road, Nissan Intelligent Mobility's Lane Departure Warning and Intelligent Lane Intervention assists you when you're straying away from your lane by gradually applying the brakes. The Nissan LEAF offers a suite of intelligent technologies designed to look ahead, behind, and all around you, so you can look forward to a more confident drive

Get a little warning before you make a move.

Sense more around you. Even if you can't see that car sneaking up on you or that child on the corner that's about to cross the road, you can count on Nissan Intelligent Mobility features to take notice and give you a heads-up. Whether you're backing out of a parking spot or changing lanes on a highway, they make you more aware of your surroundings and give you a whole new level of confidence.

Intelligent Around View Monitor

Using four cameras, the Intelligent Around View Monitor gives you a virtual 360° view of your surroundings, as well as visual and audible alerts when an object is detected moving nearby.

Rear Cross Traffic Alert*

Detecting fast moving objects in your path when reversing, the Rear Cross Traffic Alert sends audible and visual warnings with its specialized rear sensors and reverse camera.

Intelligent Driver Alertness

Intelligent Driver Alertness analyzes driver steering behavior to send an alert if signs of drowsiness or inattention are detected. A coffee cup on the instrument panel display indicates that it might be time to take a break from driving.

Intelligent Rear View Mirror

When you need a clearer view, go from mirror to monitor with just a flip of a switch.
When turned on, a camera at the rear hatch expands your rear field of vision, helping you see around obstructions for a completely unimpeded view.

Feel the rush of instant acceleration.

It's a thrill you never saw coming. The Nissan LEAF's 100% electric drivetrain delivers instant acceleration as soon as you touch the pedal. Designed with the battery pack sitting low on the chassis for a low center of gravity, it lets you hug the road with less vehicle body roll. The mere turn of your wheel can instantly raise the excitement of your driving experience.

One e-Pedal, lots of excitement.

The e-Pedal allows the driver to start from a standstill, accelerate and brake, and even bring the car to a complete stop and hold it in position, solely by using the accelerator pedal. The driver doesn't need to switch from the accelerator to the brake. Driving with the option to use only one pedal offers a completely new driving experience, relieving stress in congested traffic and providing refreshingly sporty and fun EV quality on winding roads.

Using the e-Pedal is optional in the Nissan LEAF. The driver can choose to switch between the e-Pedal and the normal 2 pedals for accelerating and braking options by pressing the e-Pedal button.

Plug, charge, and have an amazing drive.

It has never been more convenient to get moving. Experience freedom from your gas pumping routine with the LEAF's convenient charging options. Whether you're at home or on the go, you can charge anywhere with this all-electric vehicle. The Nissan LEAF is also designed with a regenerative braking system that can recharge a part of the vehicle's battery when you decelerate or brake. There's never a better time to go electric than now.

Take charge of the future through sustainability.

All Nissan's electric vehicle batteries are given a second life through certified recycling company partnerships. This allows all of us to benefit from the transition towards a more sustainable society.

Like your mobile phone, you can charge the LEAF overnight. Just plug* it into a standard 220V power source with a dedicated socket.*

Home Charger (EVSE Cable)

Approximately 18.5 hours from low battery indicator to full charge.

Charge anywhere.

Wall Box Chargers can be installed as an option at home and are also available in some public spaces.

Wall Box Charger

Approximately 7.5 hours from low battery indicator to full charge.*

Charge on the go.

An ever-expanding network of public
Quick Charging Stations means
you'll have a lot of options
for your next charge.

Quick Charger

Approximately 40 minutes from low battery indicator to 80%.*

Charging time may vary depending on the current charge of the battery.

Photo may vary from actual unit.

*With Li-ion battery temperature at 25°C. Charging time may vary depending on the current charge of the battery when plugged in. Charging time depends on charging conditions, including charger type and condition, battery temperature, and as well as ambient temperature at point of use.

Connect the way you want.

With the LEAF's technologies, you can tailor how you stay in touch. Just plug in your compatible smartphone to have access of what you need. With Bluetooth connectivity, it's easier than ever to connect with your world.

People to see? Places to be? Just ask Siri[®]. Equipped with Siri[®] voice control, standard Apple CarPlay[®] brings your contacts, favorite messaging apps,

Apple Music® playlists, Apple Maps, and more on board to your Nissan LEAF. Simply plug in your compatible iPhone® and go.*, **

With standard Android Auto™, you can keep your eyes on the road and hands on the wheel while using your voice to help you with your day.

Ask Google to play your favorite song, navigate home, or respond to a text hands-free. Just say, "Hey Google" or long-press the voice control button on your steering wheel.**, ***, ****

Photo may vary from actual unit.

Grab hold of a driver-centric design.

It's all around you. Bold lines, distinctive touches, and the sense that this is a vehicle like no other. The Nissan LEAF's driver-centric environment proves you don't have to sacrifice comfort or convenience when driving electric. With features like a D-shaped steering wheel, a distinctive center console, and a "floating" touch-screen display that puts your compatible mobile phone on center stage with Android Auto or Apple CarPlay®, it's clear that this interior was designed with you in mind.

Advanced Drive Assist Display

The customizable digital information display lets you tailor every detail of your drive from range, to power use, to audio.

Have the information you want at a glance.

Zero Gravity Seats

Pursuing the ideal posture to make long drives more pleasant, these seats are designed comfortably to ease the feeling of fatigue from long drives.

D-Shaped Steering Wheel

The unique D-shaped steering wheel gives the LEAF an even sportier look, while also making entering and exiting the driver's seat easier.
